

# RetailSense AI

Your AI Co-pilot for Smarter Retail.

# **The way we manage retail is no longer working.**

Running a successful retail business is harder than ever. You are surrounded by data from sales and stock systems, but starved of the simple insights needed to make critical decisions.

Retailers consistently struggle with tracking sales, stock levels, and forecasting demand.

# The Hidden Costs of ‘Good Enough’

Manual analysis is not just slow; it directly impacts your bottom line. These are the daily realities:

## Lost Revenue

Unnoticed low-stock situations mean turning away customers who are ready to buy.

## Wasted Hours

Valuable time is spent manually wading through spreadsheets to analyse sales and stock.

## Missed Opportunities

Top-selling items are not identified quickly enough to maximise their potential.

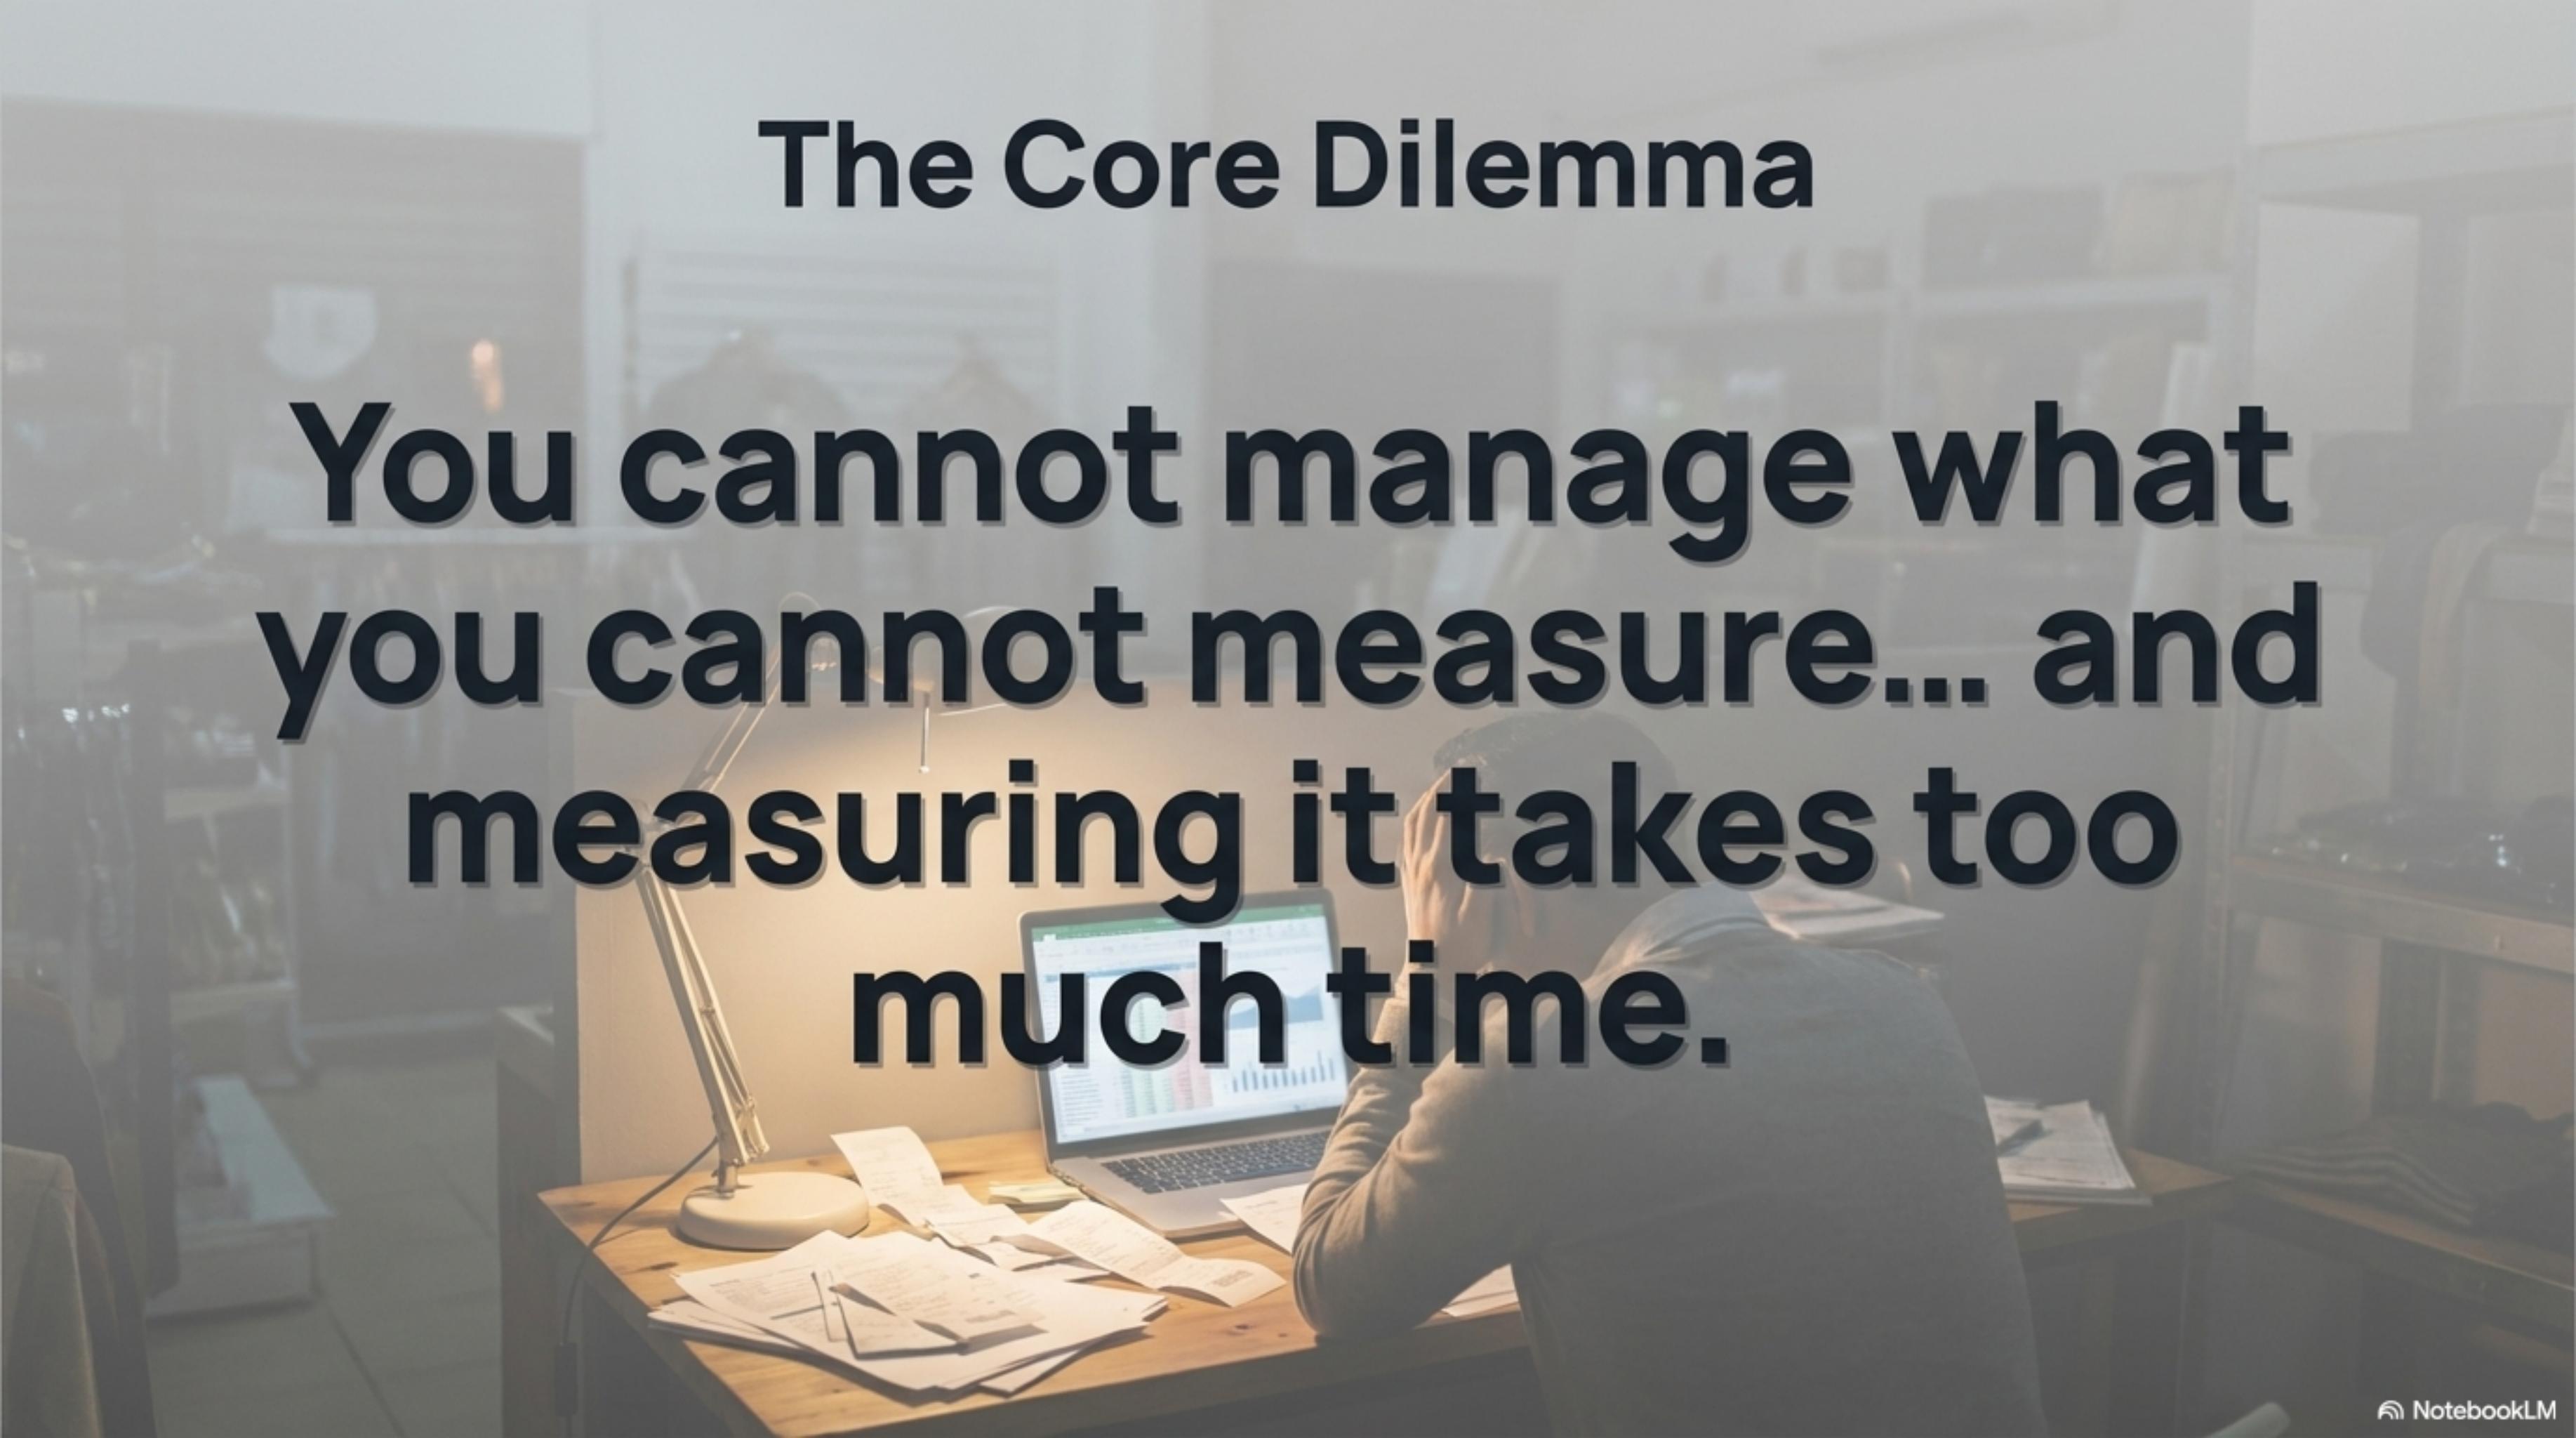

## Reactive Firefighting

Without forecasting, you’re constantly reacting to shifts in demand instead of preparing for them.

# The Core Dilemma

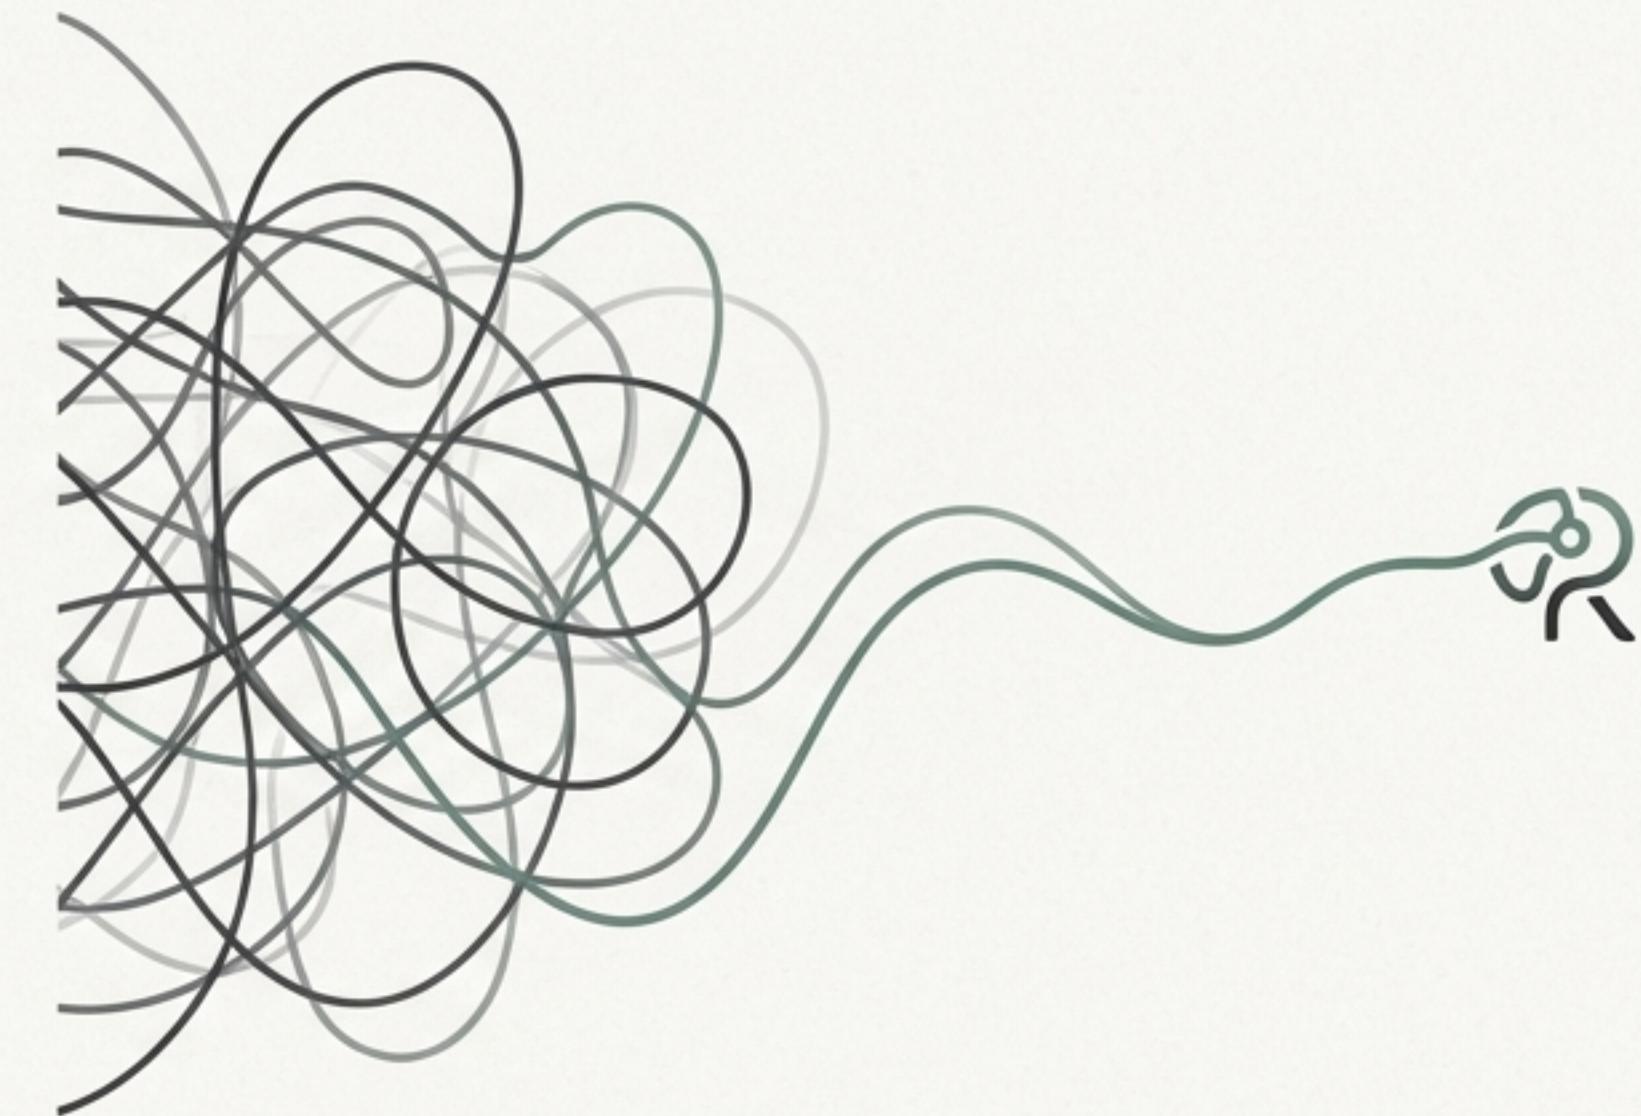

You cannot manage what you cannot measure... and measuring it takes too much time.

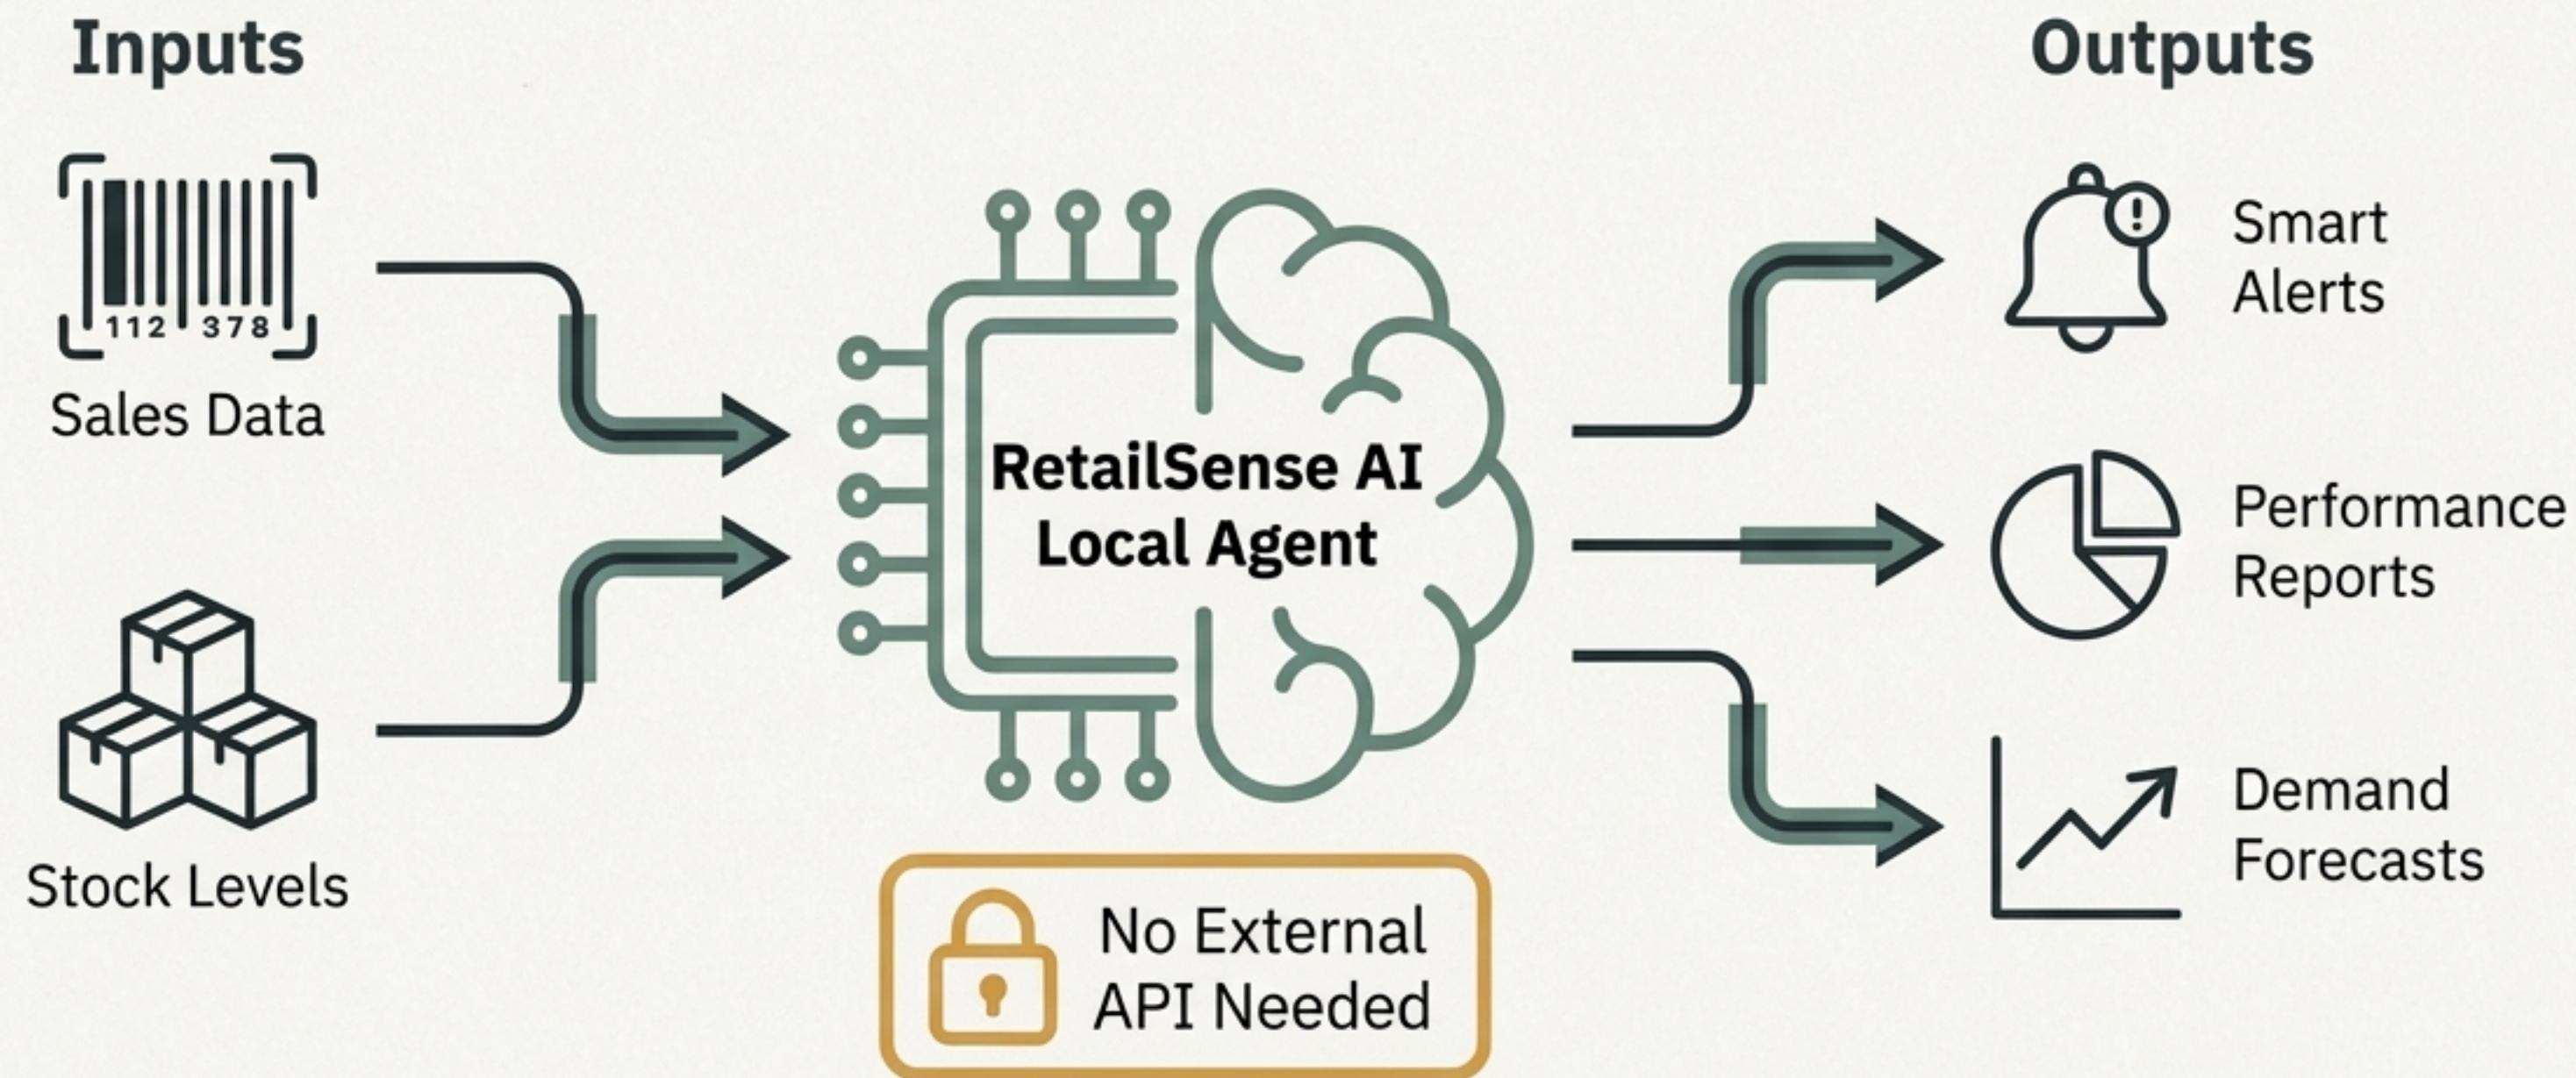

# Introducing RetailSense AI

The intelligent agent that automates your analysis and simplifies your decisions.

RetailSense AI uses Agentic automation and analytics to assist retailers, turning complex data into clear actions. It automates and simplifies the essential tasks that hold your business back.

# How It Works: Your On-Premise AI Analyst

Your data stays with you, on your machine. We provide the intelligence locally, eliminating cloud privacy risks and reliance on external connections.

# Core Capabilities, Reimagined for Retail

## Automated Insights

Instantly understand your sales, stock levels, and emerging trends with automatic data analysis.

## Live Intelligence

Ask plain-English questions directly to the agent, such as “What were our top products this week?” or “Show me low stock items”.

## Proactive Forecasting

(Optional) Use Prophet-powered forecasting to anticipate future demand and prepare your inventory accordingly.

## Smart Alerts

Receive automatic email alerts for low-stock items, allowing you to act before you lose a sale.

# Designed for Trust and Control

## The 'Safe Agent' Principle

We provide the insight; you make the call. RetailSense AI is designed to support, not replace, your expertise. Critical actions, such as placing a new stock order, always require your explicit user approval. You are always in command.

# The New Reality: Data-Driven, Effortless, Profitable.

Shift your focus from managing spreadsheets to growing your business. With RetailSense AI, **you gain the clarity and efficiency to run a smarter, more successful retail operation.**

# The RetailSense AI Advantage

## Before

- **Inventory Management:** Guesswork and stock-outs.
- **Sales Analysis:** Hours of manual spreadsheet work.
- **Decision Making:** Based on gut-feel and old data.
- **Operations:** Reactive scrambling and lost sales.

## After with RetailSense AI

- **Inventory Management:** Optimised stock levels and timely alerts.
- **Sales Analysis:** Instant performance analytics.
- **Decision Making:** Intelligent, data-backed restocking decisions.
- **Operations:** Efficient, automated workflow and loss prevention.

# Empowering the Modern Retailer

Built for the individuals at the heart of retail. Our solution is designed for:

- Retail Shop Owners
- Inventory Managers
- Small to Medium-sized Enterprises (SMEs)
- Speciality stores like boutiques, grocery stores, and electronics shops.
- Anyone who wants simple, automated retail insights without complex tools.

# Your Business, Supercharged

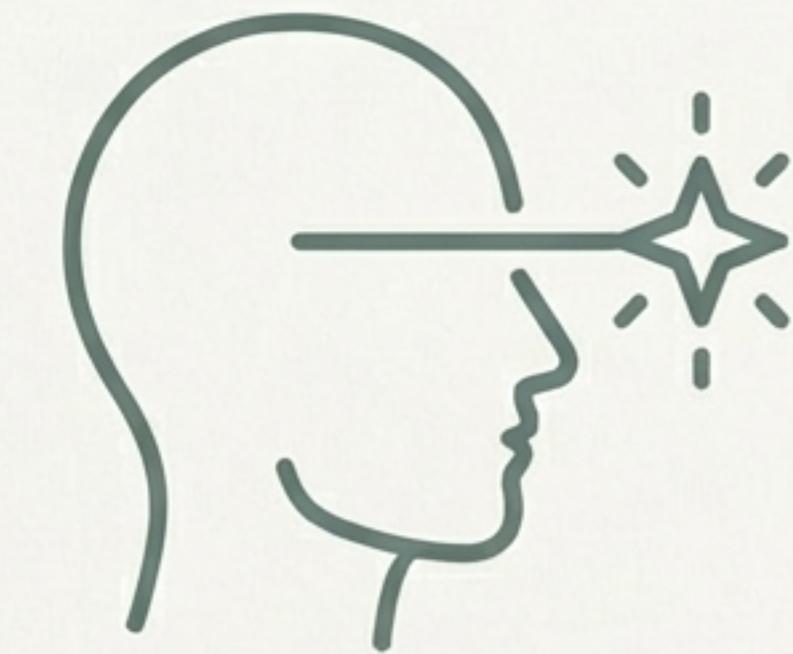

## Save Time

Automate hours of manual analysis and data entry.

## Increase Revenue

Prevent lost sales with proactive, intelligent low-stock alerts.

## Gain Clarity

Make smarter, faster decisions with powerful insights at your fingertips.
